Dr. rer. nat. Irena Schindler

AI Engineer & Lead Data Scientist · LLM Agents · Voice AI · Automation

irena@aiden.ae · github.com/Irena-Schindler
Remote worldwide (GMT+4) · on-site in Dubai/UAE
German & English (fluent)

PROFILE

Computer scientist (PhD) with over 10 years in machine learning, data science and AI, including 8 years in large enterprises (Volkswagen AG, Konica Minolta Business Solutions Europe). I take AI from concept to production: from forecasting models and data architecture to a virtual support assistant saving €34,000 per month, and LLM and voice agents that handle real customer conversations every day. Team leadership, stakeholder management and knowledge transfer (university teaching, workshops, talks) are part of my daily work.

€34,000/month saved with an AI assistant in 1st-level support	**93%** forecast accuracy, consumables sales (enterprise)	**Lead** data science team at Volkswagen AG	**Production** voice and LLM agents in live customer operations (DACH)

EXPERIENCE

CEO & AI Engineer 06/2026 – present
AIDEN – AIO All In One (Artificial Intelligence Developing Services LLC), Dubai

- Design, development and operation of AI phone and chat agents for companies in DACH (retail, fitness, services): prompt and flow design, tool/function calling, knowledge bases (RAG), appointment booking, call transfer, WhatsApp
- Integration with customer systems via REST APIs, webhooks and industry software; quality assurance based on conversation analytics
- Built a multi-tenant customer portal with versioning, abuse protection and an MCP interface; GDPR documentation (DPA)

Lecturer, Machine Learning & Parallel Programming 03/2026 – 10/2026
University of Europe for Applied Sciences, Dubai (part-time)

CEO & Lead Data Scientist 07/2025 – 06/2026
Future Forge Training, Dubai (now part of AIDEN)

- AI and data science training for professionals and organisations; advisory on data-driven CRM, marketing automation and data governance

Lead Data Scientist 02/2022 – 05/2025
Volkswagen AG

- Led a team of data scientists; translated stakeholder requirements into analytics and ML solutions
- ML models for predictive maintenance and data-driven strategies that improved customer satisfaction
- Enterprise data model and automated ingestion from multiple source systems into a central database
- Developed a CRM system for sales and customer data: better customer service and higher lead conversion
- Established best practices for data governance and ethical AI; data literacy workshops

Senior Data Scientist 01/2018 – 01/2022
Konica Minolta Business Solutions Europe (European headquarters)

- AI-powered virtual assistant took over 1st-level support: **€34,000 cost savings per month** in the German national organisation alone
- AI forecasting model predicting consumables (cartridge) sales with **93% accuracy**
- Designed and deployed ML models for products and customer service; mentored junior data scientists

EDUCATION

Dr. rer. nat. (PhD) 11/2013 – 12/2017
Leibniz University Hannover, Institute of Theoretical Computer Science
Thesis: Parameterized complexity of decision problems in non-classical logics

SKILLS

AI & LLM: LLM agents, RAG, prompt & flow design, function calling, evaluation, guardrails, MCP, Qdrant, Langfuse, LiveKit

ML & data science: predictive modelling, forecasting, advanced analytics, data visualisation

Data: data modelling, data integration, data governance, GDPR

Voice & conversational AI: AI phone assistants, SIP/telephony, WhatsApp Business, chat widgets

Languages & tools: Python, FastAPI, R, SQL, REST APIs, Docker, GitHub Actions, AWS, Salesforce

Leadership: team lead, stakeholder management, workshops, university teaching, talks (incl. JETSTREAM)
